Quality Buildings, LLC
Liberty Place
313 W Liberty St #365
Lancaster, PA 17603

To Whom It May Concern:

Benchmark Construction Company, Inc. is pleased to provide this reference letter for framing work done by Quality Buildings at our project to construct a four-story, wood-framed building with underground parking at Kirkland Village in Bethlehem, PA.

Quality Buildings provided a full-time foreman onsite and manpower sufficient to complete the project. They worked well with other trade partners on the project. They had the skills necessary to erect the complex roof trusses the building required and provided the tools and equipment for their scope of work. They were also able to satisfactorily follow the drawings, details and specifications the work required.

If I can provide any further information, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Conway", written in a cursive style.
